## TRAFFIC POLICE TAKES BOLD INITIATIVES "YOUR SAFETY IS OUR MOTTO"

Traffic Department has taken several bold and path-breaking initiatives, by virtue of which "we have empowered our constabulary to take cognizance of traffic violations." One such scheme is "run away challan".

Under the scheme, the constabulary has been provided with a printed notebook (pocket size, with requisite printed columns) wherein he/she records the particulars of the offending vehicles, without an interface.

Based on such runaway challan, the ownership particulars are ascertained from the records of concerned RTO's and accordingly the violator is sent a challan through our *Tamili* Constable. This helps in recording more violations without any confrontation or inconvenience.

Process for on line availability of registration record of the RTO's is also being pursued by the department for tracing the violator without any delay

With the application of above scheme, startling facts of the vehicles having fake registration numbers have come to light. Similarly, Transport Department has been requested to issue advisory for general public asking them to ensure registration of vehicle compulsorily, in case of change (sale or transfer) of ownership; registration of vehicles (under rules) having original registration outside the State, as such vehicles continue to ply in the State without effecting change of ownership as the same is not only a security threat but also a loss to the State exchequer.

Similarly, it has been proposed to the Government to make it mandatory (as a prerequisite to issuing of permits) for all commercial

*A view of the inauguration of pedestrian crossing at Bikram Chowk, Jammu by IGP Traffic J&K Shri H.K.Lohia IPS*

vehicles to have GPS, RFID mounted on their vehicles, for a GPS enabled navigation and vehicle tracking system. This would have many other benefits as well. Moreover, the Fine (Compound money) is now being realized through Banks which has resulted in many advantages.

Several Pedestrian crossings have been introduced which has earned wide accolades from the general public. Other such

crossing points, foot overhead bridges etc. are also in the pipeline.

It is our constant endeavour to take technology to street for an efficient traffic management system in the State. Electronic Traffic Signal System, Electronic Traffic Control Units, Fully equipped Traffic Interceptor Vans, CCTV (including on the Highways) QRT's etc. are some of the other innovative measures taken up by the Traffic Police J&K.
